NB: subgroups with a $n$-size less than $50(<50)$ are not shown on these cross-tabs. We choose not to display $\mathrm{N}<50$ subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup.
Some values may not add up to 100 due to rounding.

Please select your gender.
