

NB: subgroups with a n-size less than 100 (<100) are not shown on these cross-tabs. We choose not to display N<100 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

Which of the following Democrats would you like to see selected as the Vice-Presidential candidate?
