

NB: subgroups with a n-size less than 100 (<100) are not shown on these cross-tabs. We choose not to display N<100 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

Would you support or oppose extending universal health care to all American children by giving all Americans under the age of 26 coverage in a government health plan modeled off of Medicare, known as "Medicare for Kids"?
