From April 1 to 4, 2024, Data for Progress conducted a survey of 1,304 LGBTQ+ adults nationally using web panel respondents. Respondents were defined as LGBTQ+ if they identified as LGBTQ+, transgender, a sexual orientation other than straight or heterosexual, or a gender identity other than male or female. The sample was weighted to be representative of the adult LGBTQ+ community by age, gender, education, race, and income. This sample is also weighted to account for an oversample of transgender adults to ensure proportional representation of the LGBTQ+ adult population. The survey was conducted in English. The margin of error is $\pm 3$ percentage points.

Estimates of the proportion of the national LGBTQ+ adult population come from cycles 62-65 of the U.S. Census Bureau's Household Pulse Survey (HPS), collected between September 20, 2023 and March 4, 2024.

NB: subgroups with a n-size less than $50(<50)$ are not shown on these cross-tabs. We choose not to display $\mathrm{N}<50$ subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.
$\mathrm{N}=1,304$ unless otherwise specified.
