

DATA FOR PROGRESS

From December 22 to December 28, 2020, Data for Progress conducted a survey of 1115 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 2.9 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

[1] As part of a recently passed coronavirus-relief package, Congress voted that U.S. citizens and green card holders will be able to receive \$600 in direct aid, even if they filed a joint tax return with an undocumented spouse, as well as additional \$600 checks per dependent child. Mixed-status families with one Social Security number-holder would also retroactively become eligible for the \$1,200 per household and \$500 per child checks allocated by an earlier coronavirus-relief bill passed in March.

When thinking about this, which statement comes closer to your view, even if neither is exactly right?

Response	Topline	Democrat	Independent / Third Party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	Hispanic or Latino/a	White
Including these mixed status families in coronavirus-relief is the right thing to do	55	73	57	36	57	54	63	52	53	60	66	69	52
Including these mixed status families in coronavirus-relief is the wrong thing to do	32	18	28	51	30	35	26	36	34	30	25	18	35
Don't know	12	9	15	13	13	11	12	12	14	10	9	13	13
