

DATA FOR PROGRESS

From February 12 to February 13, 2021, Data for Progress conducted a survey of 1234 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 2.8 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

[1] Some lawmakers in Congress are proposing a \$1.9 trillion coronavirus relief package. Other lawmakers in Congress are proposing a \$600 billion coronavirus relief package.

When thinking about both proposals, do you agree with the \$1.9 trillion or \$600 billion plan more?
