

DATA FOR **PROGRESS**

From May 28 to June 1, 2021, Data for Progress conducted a survey of 1,323 likely voters nationally using web panel respondents. The sample was weighted to be representative of American adults by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

N=1323 unless otherwise specified. Some values may not add up to 100 due to rounding.

[1] This week, Royal Dutch Shell, the biggest oil and gas producer in Europe, was ordered by a Dutch court to reduce its carbon emissions by 45% by 2030, compared to 2019 levels.

The court found that Shell's carbon emissions pose a "very serious threat" to Dutch residents, and that the company has an "individual responsibility" to reduce emissions. Shell had argued in the case that climate change is a broader societal issue, and that it wasn't appropriate to ask an individual company to reduce its carbon emissions.

When thinking about this court ruling, which of the following comes closer to your view, even if neither is exactly right?

		D	I	R
The court is right to require Shell reduce its carbon emissions	63%	78%	65%	45%
Shell should not be required to reduce its emissions	24	12	21	42
Don't know	12	10	15	14
