

DATA FOR PROGRESS

From July 28 to 30, 2021, Data for Progress conducted a survey of 1,184 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,184 unless otherwise specified.

[1] U.S. territories including Puerto Rico, Guam, and the U.S. Virgin Islands receive less funding for Medicaid and Medicare compared to the federal funds given to states. A law that temporarily increased federal funding for Medicaid in the territories will expire on September 30.

Members of Congress are currently negotiating on a large budget bill. Some lawmakers are proposing that the bill include funding for the public health insurance programs in the territories that is equal to what states receive.

Would you support or oppose including full Medicaid and Medicare funding for U.S. territories in the budget bill?

[2] The Supplemental Security Income (SSI) is a federal program that provides cash payments to people with limited or no income who are disabled, blind, or aged 65 and over. Eligibility to receive SSI is limited to the 50 states, the District of Columbia, and the Northern Mariana Islands. This means U.S. territories including Puerto Rico, Guam, and the U.S. Virgin Islands are not eligible for the program.

Would you support or oppose expanding the SSI program to U.S. territories as part of Congress's next major budget bill?

[3] U.S. territories like Puerto Rico, Guam, and the U.S. Virgin Islands receive very limited funding for nutrition assistance programs, in contrast to the federal funding received by U.S. states. As a result, nutrition programs are less responsive to the food security needs of American citizens in the territories compared to the Supplemental Nutrition Assistance Program (SNAP) in the states.

Would you support or oppose expanding the SNAP program to U.S. territories as part of Congress's next major budget bill?
