

DATA FOR **PROGRESS**

From May 20 to 24, 2022, Data for Progress conducted a survey of 1,092 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 3 percentage points.

N=1,092 unless otherwise specified. Some values may not add up to 100 due to rounding.

[6] Big Tech companies such as Amazon are known to buy up smaller companies to become even bigger. Experts say that these types of "mergers" often help the larger business prevent competition from smaller businesses and allow the larger companies to unfairly increase consumer prices for goods and services.

[8] Some lawmakers in Congress argue that companies like Amazon, Facebook, and Google are monopolies because they face no real competition and use their size to crowd out competition, hurting small businesses and consumers.

Others argue that real competition and consumer choice about what websites to use still exist across the Internet and that these companies are providing very valuable services that billions of people rely upon.

Knowing what you know now, do you agree or disagree that the economic power of technology companies like Amazon, Facebook and Google is a problem facing the U.S. economy?
