

DATA FOR **PROGRESS**

From May 27 to June 5, 2022, Data for Progress conducted a survey of 683 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 4 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=683 unless otherwise specified.

[1] Which of the following best describes why you would be most likely to vote for the Democratic candidate for U.S. Congress?

Response	Topline	I always vote for Democrats for Congress	I normally vote for Democrats for Congress, but have voted for Republicans for Congress in the past	I vote about 50/50 for Democrats and Republicans for Congress
Republican policies have moved too far to the right and are becoming extreme	18	12	23	28
I believe that Democrats will do a better job handling economic conditions like gas prices, food prices, and other rising costs	10	12	7	4
I believe that the Democratic Party better represents my values	27	30	30	16
I am worried about Republicans cutting healthcare, Social Security, and Medicare	10	8	10	18
I believe that Democrats will be better able to handle the current situation with the coronavirus pandemic	4	4	4	5
Republicans are a threat to American democracy	20	23	16	16
Democrats understand and care about my district's needs more than Republicans do	9	8	9	12
Don't know	3	3	0	1
Weighted N	683	384	191	75

DATA FOR **PROGRESS**

From May 27 to June 5, 2022, Data for Progress conducted a survey of 679 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 4 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=679 unless otherwise specified.
