📊 DATA FOR *PROGRESS*

From September 27 to 28, 2023, Data for Progress conducted a survey of 1,255 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,255 unless otherwise specified.

Senator Menendez should resign because he has been charged with a crime, even though he has not yet been found guilty. Politicians should be held to the highest standard of trust, and he should resign to ensure his constituents have full trust in the politicians who represent them.	66	72	64	60	63	69	68	65	64	70	63	67	65
Senator Menendez should not resign because even though he has been charged with a crime, he has not yet been found guilty. In this country, people are innocent until proven guilty, and he should not resign until his case has been heard by a jury of his peers.	24	16	26	30	24	23	17	27	23	25	16	25	19
