

DATA FOR PROGRESS

From October 25 to 31, 2024, Data for Progress conducted a survey of 908 likely voters in Pennsylvania using SMS and web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and 2020 recalled vote. The survey was conducted in English. The margin of error associated with the sample size is ± 3 percentage points. Results for subgroups of the sample are subject to increased margins of error. The design effect for this survey is 1.63. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=908 unless otherwise specified.

[1] Do you have a favorable or unfavorable opinion of the following people?

— Donald Trump
