🏛 DATA FOR *PROGRESS*

From November 19 to 21, 2024, Data for Progress conducted a survey of 624 likely voters in California using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ±4 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=624 unless otherwise specified.

[1] How concerned or not concerned are you about digital surveillance by **corporations**?

[12] Donald Trump has previously embraced policies that allow for digital surveillance by government actors on individual behavior including information related to their medical care.

Experts have raised concerns that such surveillance could be used to enact policies that could threaten vulnerable Californians including immigrants, LGBTQ+ communities, and those seeking reproductive care.

Would you support or oppose California lawmakers taking action to prevent or limit digital surveillance of Californians by the federal government and other out-of-state actors?
