

# DATA FOR PROGRESS

From March 1 to 2, 2024, Data for Progress conducted a survey of 1,221 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is  $\pm 3$  percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,221 unless otherwise specified.

**[1]** Some corporations have avoided paying taxes by allowing their employees to use the company's business jets for their own personal trips. The corporations then classify expenses from these personal trips as "business expenses," which they can then deduct from their tax rate in order to pay less taxes.

Do you support or oppose the U.S. government **increasing enforcement** over corporations that avoid paying taxes by allowing their employees to use the company's business jets for personal trips?
