

From May 10 to 13, 2024, Data for Progress and Climate Power conducted a survey of 1,231 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ± 3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,231 unless otherwise specified.

[1] If a candidate for elected office told oil and gas industry executives that donating to their campaign would be a "deal" for them because of the taxation and regulation they would avoid, which of the following would come closest to your view?

[2] The Washington Post recently reported that Donald Trump told a group of oil executives that they should "raise \$1 billion to return [him] to the White House. At the dinner, he vowed to immediately reverse dozens of President Biden's environmental rules and policies and stop new ones from being enacted."

Knowing this, how concerned, if at all, are you about a potential second presidential term for Donald Trump?
