📊 DATA FOR *PROGRESS*

From May 10 to 14, 2024, Data for Progress conducted a survey of 1,268 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit http://dataforprogress.org/our-methodology.

The following are defined as 2024 swing states: Arizona, Georgia, Michigan, Nevada, North Carolina, Pennsylvania, and Wisconsin.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,268 unless otherwise specified.

[1] Do you support or oppose each of the following policies?

— Raise the minimum wage to $17 an hour by 2028 and adjust each year to keep up with changes in costs of living

📊 DATA FOR *PROGRESS*

From April 19 to 22, 2024, Data for Progress conducted a survey of 1,265 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,265 unless otherwise specified.

[9] The Inflation Reduction Act of 2022 included an annual $2,000 cap on out-of-pocket spending through Medicare Part D, the part of Medicare that covers the cost of prescription drugs. This means that **no one on Medicare** will pay more than $2,000 a year for prescription drugs starting in 2025.

Do you support or oppose **expanding** this to **all Americans**, so that no one will pay more than $2,000 a year for prescription drugs?

[10] The Inflation Reduction Act of 2022 allows Medicare to negotiate directly with drug companies to lower the prices of **20 drugs** per year.

Do you support or oppose **expanding** this so that Medicare can negotiate directly with drug companies to lower the prices of **50 drugs** per year?

From March 1 to 2, 2024, Data for Progress conducted a survey of 1,221 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and 2020 recalled vote. The survey was conducted in English. The margin of error associated with the sample size is ±3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit http://dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,221 unless otherwise specified.
