

DATA FOR PROGRESS

From May 3 to 4, 2024, Data for Progress conducted a survey of 1,206 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and 2020 recalled vote. The survey was conducted in English. The margin of error is ±3 percentage points

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,206 unless otherwise specified.

Access to social media is mostly helpful. Young people have benefited from having access to spaces online where they can make positive connections with others and learn about the world.	42	50	35	40	39	46	40	46	52	41	48	49	61	48	42	33
Access to social media is mostly harmful. It is a constant source of harassment, bullying, exploitation, and unrealistic standards that has negatively impacted young people's mental health and well-being.	47	41	51	50	49	44	48	45	31	49	38	42	28	39	47	58
