⏹ DATA FOR *PROGRESS*

From April 26 to 29, 2024, Data for Progress conducted a survey of 1,265 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

The results shown below are filtered to only voters who selected Joe Biden or Donald Trump in a 2-way ask about their 2024 presidential election vote choice.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,194 unless otherwise specified.
