

# DATA FOR PROGRESS

From July 3 to 4, 2024, Data for Progress conducted a survey of 1,231 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and 2020 recalled vote. The survey was conducted in English. The margin of error associated with the sample size is  $\pm 3$  percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit [dataforprogress.org/our-methodology](https://dataforprogress.org/our-methodology).

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,231 unless otherwise specified.

**[1]** To what extent do you agree or disagree with the following statement:

"There should be new limits on U.S. corporations spending money in our elections if the corporations have any foreign ownership."

**[2]** Some lawmakers are proposing to **ban** all companies that are owned or influenced by individuals from foreign countries from spending money on U.S. elections.

Specifically, this ban would apply to any company with at least 1% ownership from a single foreign individual or entity, or at least 5% ownership from multiple foreign individuals or entities. These companies would be banned from all spending on U.S. elections.

Do you support or oppose this proposal?
