📊 DATA FOR **PROGRESS**

From June 5 to 6, 2024, Data for Progress conducted a survey of 1,238 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and 2020 recalled vote. The survey was conducted in English. The margin of error associated with the sample size is ±3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,238 unless otherwise specified.

[1] Medicare is divided into two categories. About half of people with Medicare are enrolled in **Traditional Medicare**, which is a **government-administered program**, while the other half are enrolled in **Medicare Advantage**, which is administered by **private health insurance companies**.

Both programs are funded primarily by the Medicare Trust Fund, which comes from payroll taxes.

Some Medicare Advantage plans include benefits that are not covered under Traditional Medicare. For example, many Medicare Advantage plans offer dental, vision, and hearing benefits. Additionally, Medicare Advantage plans have an out-of-pocket spending limit and automatically include prescription drug coverage, while Traditional Medicare does not.

Would you support or oppose legislation that would **expand Traditional Medicare** so that it covers all of the services that are covered under Medicare Advantage for the same price?

Response	Topline	Democrat	Independent / Third party	Repub-lican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
