

# DATA FOR **PROGRESS**

From June 28 to July 14, 2024, Data for Progress conducted four surveys with 4,684 respondent interviews of U.S. likely voters, including 566 swing voters, using web panel respondents. Each sample was weighted to be representative of likely voters by age, gender, education, race, geography, and 2020 recalled vote. The surveys were conducted in English. The margin of error associated with the sample size is  $\pm 1$  percentage point, and crosstabs of subgroups of the sample are subject to increased margins of error. For more information please visit [dataforprogress.org/our-methodology](https://dataforprogress.org/our-methodology).

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=4,684 unless otherwise specified.
