## d

From July 12 to 14, 2024, Data for Progress, in partnership with Split Ticket, conducted a survey of 1,011 Black or African American likely voters in Arizona, Georgia, Michigan, Nevada, North Carolina, Pennsylvania, and Wisconsin using web panel respondents. The sample was weighted to be representative of Black likely voters by age, gender, education, race, geography, and 2020 recalled vote. The survey was conducted in English. The margin of error associated with the sample size is $\pm 3$ percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. The design effect is 1.22 . For more information please visit dataforprogress.org/our-methodology, and for more information on how we classify respondents as swing voters, please visit dataforprogress.org/swing-voter-methodology.

NB: subgroups with a n -size less than $50(<50)$ are not shown on these cross-tabs. We choose not to display $\mathrm{N}<50$ subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.
$N=1,011$ unless otherwise specified.
