

DATA FOR PROGRESS

From July 26 to 30, 2024, Data for Progress conducted a survey of 1,226 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and 2020 recalled vote. The survey was conducted in English. The margin of error associated with the sample size is ± 3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,226 unless otherwise specified.

[18] As attorney general of California in 2015, Kamala Harris investigated possible criminal violations after an oil pipeline spill released 143,000 gallons of crude oil, polluting Santa Barbara's coastline. In her 2020 campaign, she also called for holding corporate polluters accountable and advocated for a carbon tax.

Knowing this, do you support or oppose Harris taking action to hold corporate polluters accountable and prosecute Big Oil for their contributions to climate change, including their impacts on extreme weather events and public health?
