📊 DATA FOR *PROGRESS*

From August 9 to 11, 2024, Data for Progress conducted a survey of 1,214 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and 2020 recalled vote. Swing states voters are those in: Arizona, Georgia, Michigan, North Carolina, Nevada, Pennsylvania, and Wisconsin. The survey was conducted in English. The margin of error associated with the sample size is ±3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflectedin tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,214 unless otherwise specified.

[1] Below are some recent actions by the Federal Trade Commission (FTC). For each, please say whether you support or oppose the action:

— Banned noncompete clauses from employment contracts, so employers cannot prevent workers from accepting a job at a competing business
