

# DATA FOR PROGRESS

From August 2 to 4, 2024, Data for Progress conducted a survey of 659 U.S. adults ages 18-26 nationally using web panel respondents. The sample was weighted to be representative of U.S. adults ages 18-26 by age, gender, education, race, and geography and included ~100n oversamples of Black and Latino adults aged 18-26 which were weighted to their appropriate proportions of U.S. adults ages 18-26. The survey was conducted in English. The margin of error associated with the sample size is ±4 percentage points. Results for subgroups of the sample are subject to increased margins of error. For more information please visit [dataforprogress.org/our-methodology](https://dataforprogress.org/our-methodology).

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=659 unless otherwise specified.

## [1] START GREEN JOBS SECTION

Green jobs make up a growing segment of the overall workforce. The Bureau of Labor Statistics defines two categories of **green jobs and careers**:

- Jobs in businesses that produce goods or provide services that benefit the environment or conserve natural resources; and,
- Jobs in which workers' duties involve making their company's processes more environmentally friendly or use fewer natural resources.

Workers can enter green careers through multiple pathways, including traditional pathways like higher education and internships, as well as less traditional pathways including national service programs, registered apprenticeships, and entrepreneurship.

Knowing what you just read, do you have a favorable or unfavorable opinion of **green jobs and careers**?

### [30] START AMERICAN CLIMATE CORPS SECTION

The **American Climate Corps** (ACC) is a workforce training and service initiative that will engage tens of thousands of young Americans in service fighting the impacts of climate change today while training tomorrow's clean energy and climate-resilience workforce.

ACC positions are hosted by a variety of organizations, including nonprofits, local and state government agencies, tribal communities, institutions of higher education, and faith-based institutions nationwide.

Participants in the ACC typically serve for a few months to a full year and commonly receive a modest living allowance or stipend, along with an end-of-term education award. This award can be utilized to cover future educational expenses or assist in paying down student loans.

Knowing what you just read, do you have a favorable or unfavorable opinion of the American Climate Corps (ACC)?

**[70] START APPRENTICESHIPS SECTION**

Registered apprenticeships are a career development pathway that enables individuals to earn progressive wage increases as they advance through training that prepares them for a job in an in-demand occupation.

These programs combine structured and supervised on-the-job training with related classroom instruction, which can often include obtaining nationally-recognized skill certification credentials. Apprenticeships usually take between 1 to 5 years to complete, and can serve as a comparable career entry pathway to obtaining a college degree in a specific field of study.

Knowing what you just read, do you have a favorable or unfavorable opinion of **registered apprenticeships**?

**[82]** New business startups account for an important and growing segment of our economy. About 10% of workers in the U.S. are self-employed, and new business startups are 40% higher compared to pre-pandemic levels.

Green sector businesses are a meaningful contributor to this growth, and the supply of new green businesses is in part driven by demand from consumers. For example, a recent survey found that 50% of consumers say sustainability is one of their top four criteria when purchasing products or services.

How interested are you, if at all, in pursuing entrepreneurship or small business ownership in a green sector industry as a career path?
