

From March 7 to 8, 2025, Data for Progress conducted a survey of 1,203 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ±3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,203 unless otherwise specified.

[1] Which of the following best describes your current housing status?

[20] Recently, some insurance companies announced that they are increasing the prices of home insurance policies or will no longer be offering new home insurance policies in certain locations and states such as California, Florida, and Minnesota.

How responsible do you think each of the following are for recent changes in the home insurance sector, including spikes in home insurance rates and insurance companies leaving state insurance markets?

— State insurance regulators

[36] Some property insurance companies have implemented emergency rate increases on policyholders in states where more home insurance claims are being filed, such as California and Florida. These companies have stated that they need to raise rates for their policyholders in order to afford paying out an increased number of claims filed.

Do you agree or disagree that it is appropriate to charge policyholders more when there is an increase in claims filed by other customers in the state?
